

# Trailer Plug Testers 12V/24V

Compatible with  
  

## Description

**Very useful for vehicle inspection, electrical workshops, tow bar installers, agricultural machinery workshops and even private individuals.**

Allows you to **verify** that the plugs are **correctly connected** after installation.

Versions with a **4-meter cable** are available for all models. This allows checks to be carried out from **driver's seat**.

- ✓ High brightness LED indicators.
- ✓ No external power supply needed.
- ✓ Protected against connection errors.

## Complete set vehicles 12 V (13 + 7 poles) - COM-04-03051

### 13-pole model with simulation

Simulates lamp consumption. Allows all vehicles to be checked, including those equipped with CAN BUS (and other system that detect burnt-out lamps).

#### Testers:

- Trailer plug tester with 13-pin 12V DIN/ISO 11446 Simulation.
- 13-to-7-pin 12 V adapter.

## Complete set vehicles 24 V (15 + 2 x 7 poles) - COM-04-03050

### 15-pole model with simulation

Simulates lamp consumption. Allows all vehicles to be checked, including those equipped with CAN BUS (and other system that detect burnt-out lamps).

#### Testers:

- DIN/ISO 12098 24 V 15 poles with simulation.
- DIN/ISO 1185 24 V / 7 poles N type.
- DIN/ISO 3731 24 V / 7 poles S type.
